Explanation:

- 1) The height of the fixed usage rate per month depends on the volume of the connection capacity (diameter of the connection line) and will be charged per connection. This rate is intended to cover the costs for the network;
- 2) The variable usage rate will be charged for the actual use (m³);
- 3) The discount is equal to the tariff subsidy by the Ministry of Infrastructure and Water Management (I&W). Subsidies can only be granted on the basis of the law to reduce the fixed rate of use and to reduce the rate for delivery with the water truck;
- 4) The rate per watertruck concerns the rate for drinking water per m³ that will be delivered by truck and in which the costs for transportation and drinking water are discounted. This delivery has to be paid up front;
- 5) The gross rates are equal to the maximum rates set by the Authority for Consumers and Markets (ACM).

The above rates are visible on the invoices from February 2019 onwards (with a start date for consumption in January and an end date in February). For the invoice of January, the rates are as from 1st April 2018 apply. For the water truck customers, the new rates are immediately visible from 1st January 2019.
