	4"	3,278.68	-	3,278.68	4.055	-	4.055
Per water truck (4)	na	na	na	na	13.213	8.285	4.928

CONNECTION RATE

CATEGORY	CONNECTION CAPACITY	RATE PER STANDARD CONNECTION (USD) (6)	RATE PER RECONNECTION (USD)
Per connection	1/2"	1,221.38	40.00

Explanation:

- 1) The amount of the fixed monthly usage rate depends on the size of the connection capacity (diameter of the connection line) and is charged per connection. This rate is intended to cover network costs;
- 2) The variable rate is charged for actual consumption (m³);
- 3) The discount is equal to the tariff subsidy from the Ministry of Infrastructure and Water Management. By law, a subsidy can only be granted and used to reduce the fixed usage rate and to reduce the rate for delivery with the water truck;
- 4) The rate per water truck refers to the rate for drinking water per m³ that is delivered by truck and which includes the costs for transport and drinking water are included. This delivery must be paid in advance;
- 5) The gross rates are equal to the maximum rates as set by the Netherlands Authority for Consumers and Markets;
- 6) The basic rate applies to connections with a maximum length of 25 meters. For connections exceeding 25 meters, a contribution applies based on pre-calculated project costs.

The above rates are visible on the invoices from the consumption period with a start date for consumption in August 2025. For water truck buyers, the rate has not changed compared to the rate as of January 1, 2025.

let's do it
